

**REMARKS**

As requested in the Notice to Comply With Requirements for Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures, mailed October 7, 2002, submitted herewith are substitute copies (paper and computer readable form (CRF)) of the sequence listing in compliance with the requirements of 37 C.F.R. §§ 1.821-1.825. Applicants submit that the sequence listing contains no new matter, and request entry of the sequence listing into the application.

Applicants respectfully request entry of the above amendments to the specification and drawings, adding sequence identifiers to comport with the requirements of 37 C.F.R. §§ 1.821-1.825 and amending the nucleotide sequence "ACC" in FIG. 2 to "AAC" to correct a typographical error. The nucleotide sequence "ACC" in FIG. 2, which was incorrectly identified as encoding the amino acid asparagine (Asn), has been amended to "AAC" which is the correct codon for Asn. (See FIG. 10 showing the same sequence with the correct codon for Asn, i.e., "AAC".) Applicants submit the amendments contain no new matter.

Respectfully submitted,

Date: November 4, 2003
